CodeIgniter 4 ● ● ● ● ● Skillful in Codeigniter crud operation using Model view control with use of routes	Javascript ● ● ● ● ● ES 6, arrow functions, callbacks, and promises , Modules , DOM manipulations

Projects

Portfolio Using CodeIgniter 4, *a portfolio using codeigniter 4*, [🔗](#)

- Used codeigniter 4 in a way such that major of the concepts for codeigniter 4 is been covered such as MVC , controller sends data to view from data and view passes data to model through a controller.
- Used tailwind CSS for front end
- Responsive design is done

Admin Panel Management, *Handle data coming to backend panel*

- HTML, CSS, Javascript, Bootstrap, and MYSQL** are used in the admin panel, and in the existing system I have written code to show the data from the database customers are submitting from the front end
- Done in co deseed's backend panel and also implemented login with Google functionality
